

Bulletin Number: AK_IB_0025	Distribution Date: 01/06/20	Effective Date: 1/6/20
Contact Point: Metrc® Support	Subject: New Features in Metrc	
Reason: Metrc is providing an update on our newest features for Transporters.		

Greetings Metrc Users,

Metrc is pleased to provide information on our newest enhancements within the software that will be available on January 6th, 2020.

Licensees who are able to record test results on packages will now see new template options available in the Record Tests action window. All licensees who have packages with test results can now see notes associated with any specific test type when entered by the facility recording the test.

All users will now have new selectable “Starts With” option when filtering any column in the system. Additionally, all users will now see that multiple rows can be entered across all action windows in the system. This feature was initially released for just the packages action window.

New Filter By Option

Each column and grid in Metrc has been updated to include a ***Starts With*** filter option, as seen in **Figure 1** below.

Record Test Template Update

The Record Tests action window has been updated to include two additional fields in the template:

Test Batch was included to apply configured test batch(es) when applicable to all Test Packages displayed in the action window.

Test Type was included to apply test type to all Test Packages displayed in action window.

Figure 2: Record Tests Template

Please Note: The checkmark and plus added next to the above-mentioned fields can be used to append (with plus) or apply/overwrite (with checkmark) all test packages that follow in the action window.

New Column for Notes on Lab Tests

The existing Lab Results tab within the Package(s) drilldown has been updated to include a column that displays the notes that are entered by the lab in the Record Tests action window. Notes are displayed specific to each result for each sample package. The notes column displays up to 25 characters followed by ellipses, as pictured above in Figure 3. If the user clicks on the ellipses the note will expand and display as seen in Figure 4 below.

Lab Results History					
Overall	Test Name	Test Passed	Result	Notes	
Passed	Abamectin (ppm)	Passed	0.0001	This is a note. Once 25 c ...

Add Multiple Rows Functionality

The add multiple rows functionality from the package's action window has been added to all action windows within Metrc. The user will enter a value into the field next to the + icon and the action window will create that many rows for use.
