

<b>Bulletin Number:</b> OR_IB_0032	<b>Distribution Date:</b> 1/11/20	<b>Effective Date:</b> 1/18/2021
<b>Contact Point:</b> Metrc® Support	<b>Subject:</b> Upcoming Release and Data Optimization Update	
<b>Reason:</b> Metrc is providing an update on Sales Data Optimization along with our upcoming feature release related to Changing Growth Phases, and Source Production Batches		

Greetings Metrc Users,

This bulletin provides information on the latest enhancements to Metrc, which are listed below and will become effective on **January 18th, 2021**.

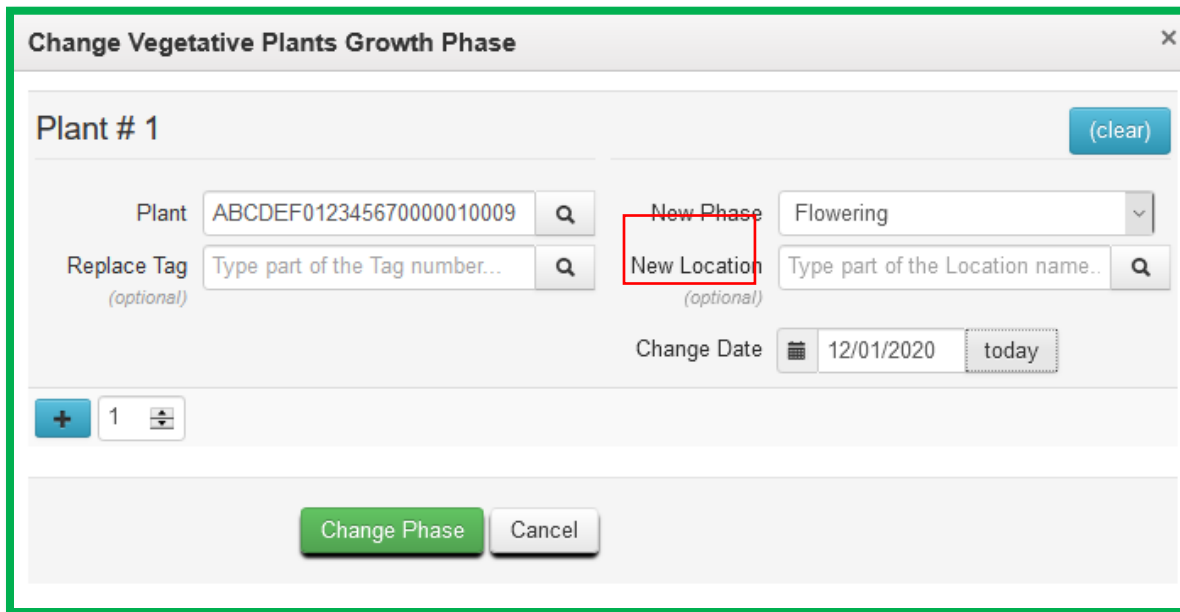

- I. Optional Location Requirements for Plants Changing Growth Phase
- II. Added Source Production Batch Column
- III. Updated OR Supplemental Guide 10.3

**Metrc is also excited to announce the implementation of Sales Data Optimization on 01/18/2021. We encourage licensees to reference the Sales Data Optimization reminder released within Bulletin 31.**

Detailed descriptions of each change are provided on the following pages:

**New Feature: Change Location Now Optional on Plant Phase Movements**

Currently when changing the growth phase of a plant(s) the New Location field is required to be entered. With the upcoming change, the New Location field will be optional when changing the growth phase of a plant(s). A location will still be required to be associated to all plants, but if the plant is not changing its location, then the field is not required to be recorded, and the original location will stay designated to the plant(s).

The screenshot shows a dialog box titled "Change Vegetative Plants Growth Phase". It contains the following fields and controls:

- Plant # 1** (with a "(clear)" button)
- Plant** field: ABCDEF012345670000010009
- Replace Tag (optional)** field: Type part of the Tag number...
- New Phase** dropdown menu: Flowering
- New Location (optional)** field: Type part of the Location name.. (This field is highlighted with a red box in the image)
- Change Date** field: 12/01/2020 (with a "today" button)
- A list of items with a "+" button and a "1" item.
- Change Phase** and **Cancel** buttons at the bottom.

**New Data Available: Source Production Batch Information**

Metrc is introducing a new Source Production Batch Numbers field that will be available within the packages grid. This field is intended to function similarly to how the Source Harvest Name and Source Packages fields function. This information will allow the identification if a package was repackaged from an existing Production Batch package. Please note that the data for Source Production Batches will only be going forward and not be retroactively applied to any existing packages from Production Batches prior to the release.

If the field indicates that the package comes from a “Multi-Production Batch”, those batches can be identify via the magnifying glass icon on the far left of the packages grid (  ) or by exporting the packages grid via the print icon (  ).

Tag	Src. H's	Src. Pkg's	Item	Category	Item Strain	Quantity	P.B. No.	Src. P.B.
▶  ABCDEF012345670000013853	2019-04-03-Harvest Room-H	ABCDEF012345670000011270	Joe's Oil 100mg	Concentrate		2 oz	XYX - 12.1.20	
▶  ABCDEF012345670000013854	2019-04-03-Harvest Room-H	ABCDEF012345670000013853	Joe's Oil 100mg	Concentrate		2 oz		XYX - 12.1.20
