

Bulletin Number: MA_IB_008	Distribution Date: 5/24/19	Effective Date: 6/1/19
Contact Point: Support@metrc.com	Subject: Beginning Inventory Deadline	
Reason: The CCC and Metrc are providing the details around the deadline for Beginning Inventory via the External Transfer functionality for both the Medical and Adult-Use licenses		

Greetings Metrc® Users,

Metrc is providing notice in coordination with the Cannabis Control Commission (CCC) on the upcoming changes to the Metrc functionality. The External Transfer functionality will be **deactivated** first for the Adult-Use Licenses and subsequently the Medical Licenses. This means that licensees must have all beginning inventory input into the system by the specified dates.

Please refer to the following detailed description outlining the changes:

Deactivation of External Transfer

The CCC has made the decision regarding the end date for beginning inventory for both the Adult-Use and Medical licenses. This means that the External Transfer functionality will be deactivated, and all beginning inventory must be input into Metrc for the following licenses on the listed dates:

Adult-Use: June 1st, 2019

Medical: June 15th, 2019

After the above dates, there will be no avenue to input beginning inventory into Metrc, and all product created following the deadlines will be sourced completely in the system. This effectively “closes the loop” and ensures that all product is completely traceable from seed-to-sale. All beginning inventory product must be input into Metrc by the above dates, per the CCC.

Please feel free to contact support at support@metrc.com or 877-566-6506 with any questions or to request a copy of previous industry bulletins.
