<b>Contact Point:</b> Metric® Support	<b>Subject:</b> New Features in Metric	
<b>Reason:</b> Metric is providing an update on our newest features in the system.		

Greetings Metric Users,

This bulletin provides information on the latest enhancements to Metric, which became effective on March 16, 2020. The enhancements are listed below. Detailed descriptions of each change are provided on the following pages.

- I. Improved the Hover display to use a table instead of a data list and incorporated dynamic positioning.
- II. Added two buttons to grids to quickly scroll to the top or bottom of a page.
- III. Users authorized to manage package inventory will see a Same Item option when creating New Package(s).
- IV. An In Transit tab has been added to the Packages page for all facility types.
- V. A Lab Samples tab has been added to the Packages page for facilities that can record test results.

### Updated Hover Display

When hovering over any magnifying glass in Metrc, a user will now see the updated table view in **Figure 1** outlining the relevant information that is currently associated to the record. In addition to the new view, users will now notice that Metrc has incorporated dynamic positioning of these tables. Meaning, if the mouse is on the left, the display will appear on the right of the screen. If it is on the top, it will appear on the bottom.

### **New Feature: Same Item Checkbox**

Users have a new Same Item checkbox option when creating a new package from an existing package as shown in **Figure 6**. Checking Same Item will assign the same package item from the source package. This option allows licensees who receive packages of an item not previously configured for their license to repackage and create lab sample packages using the same item name from the source package. Using the Same Item feature does not add the item to the list of items for that license.
