

# Nevada - Metrc Support Bulletin

<b>Bulletin Number:</b> NVIB#021	<b>Distribution Date:</b> 01/16/19	<b>Effective Date:</b> 1/14/19
<b>Contact Point:</b> <a href="mailto:support@metrc.com">support@metrc.com</a>	<b>Subject(s):</b> New Features - Waste Types	

Greetings Metrc Users,

Metrc® is pleased to provide some information on the newest feature available in the software to support legislative allowances to sell fibrous harvest waste.

## NEW WASTE REPORTING OPTIONS

When reporting waste in Harvests, you will now have a dropdown list to choose the waste type being reported. The state will configure the waste types from which you will choose.

The screenshot shows the 'Report Waste' window in the Metrc software. At the top, there's a 'Template' section with 'Unit of Measure' and 'Waste Type' dropdowns, both set to '- Select -'. Below this, there are two batch entry sections, 'Batch # 1' and 'Batch # 2'. Each batch section has a 'Batch' input field with a search icon, a 'Weight' input field with a spinner and a dropdown, and 'Waste Type' and 'Waste Date' fields. In the 'Batch # 2' section, the 'Waste Type' dropdown is open, showing options: '- Select -', 'Fibrous Waste', and 'Plant Material'. At the bottom of the window, there are 'Report Waste' and 'Cancel' buttons.

# Nevada - Metrc Support Bulletin

You will now have the option below in Waste Types:

- Plant Material– Normal harvest waste

Please note: The state may add new Waste Type options at any time.

## **NEW ADDRESS FOR METRC**

Metrc has a new address. Any checks or money orders for tag orders or industry support fees should be mailed to:

METRC LLC  
4151 South Pipkin Road  
Lakeland, FL 33811
