### **Metrc Support Bulletin**

Bulletin Number: NV_IB_0042	Distribution Date: 11/11/20 Effective Date: 11/9/20					
Contact Point: Metrc® Support	Subject: New External Patient Customer Type					
<b>Reason:</b> Metrc is providing an upo external patient sales for dispensar	date on an upcoming configura ries and a new item category: (	tion change regarding Capsule/Tablet.				

#### Greetings Metrc Users,

The NVCCB and Metrc are providing information on an upcoming change to the available Customer Types a Retail/Medical Dispensary can record sales to. Starting on 11/9/20 a Dispensary will have the ability to record sales for non-Nevada residents with an active and valid, state issued, medical/patient card through the External Patient Sales function. This new feature is in addition to the Consumer and Patient Customer Types currently available in Metrc.

When selecting an External Patient as the Customer Type, it will be required to enter both the External Patient Number and Identification Method. This change will also be supported via the API or CSV upload functions. Metrc will be releasing an API bulletin for Third Party Integrators (TPI's) explaining the new available Customer Type.

Note that for the Identification Method to be valid it must meet the criteria below:

- Be an out-of-state, non-expired medical marijuana card/letter from your home state.
- Have additional non-expired supporting government issued photo ID (matching the state of the medical marijuana card)

Please see the following pages for additional details on this change as well as information on a new Item Category of Capsule/Tablet for all Production and Retail Licenses.

## Recording an External Patient Sale

For the creation of a manual sales receipt, select the sales drop down from the navigation bar. Then select the "Receipts" option as seen in **Figure 1** to open the Sales Reciepts page.

Packages	Transfers   <del>-</del>	Sales   <del>▼</del>	Reports   -	🗸 Admin <del>-</del>
ainte		Receipts		
-ipto		Deliveries		

Figure 1: Creating a Sales Reciept

Once on the sales receipts page, select the "Active" tab in **Figure 2** to bring you to the active receipts grid, where there will be the ability to record receipts. Next, select the record receipts button to begin creating the new receipt as seen **in Figure 3**.

Please select a tab to view its content.

### **Metrc Support Bulletin**

The recording receipts action window will open, and enter the necessary information for the sale. When selecting the customer type, the External Patient button will prompt two fields, Patient Number, and Identification Method to open. Fill these fields with the the state designation and exact patient number (example – CA 12234)

When the information is recorded and correct, select the record sales receipts button and the receipt will be posted to the active receipts page where it could later be edited or finalized as seen in **Figure 5**.

Figure 6: CSV Format

# New Item Category: Capsule/Tablet

NVCCB has created the Capsule/Tablet item category for all Dispensary and Production Licenses. The Capsule/Tablet item category is to be used **instead of** the Infused Non-Edible item category for any future packages. Below, also find guidance on how to create an item using this new item category.

	Item Category	Туре	Quantity Type	Default LTS	Str
•	Capsule/Tablet	InfusedNonEdible	CountBased	NotSubmitted	No
	Flowers/Buds				

Figure 7: New Capsule/Tablet Item Category

In order to create a new item, go to the Admin area and select Items. Once in the Items grid, select "Add Items" button as shown in **Figure 8**. This will open an action window to create a new item using the categories approved by NVCCB.

Items														
		Add Items	Edit Items											
		Item	:	Category	:	Туре	:	Quantity Type	Default LTS	÷	UoM	:	Strain	÷
	Buds - AK-47		-47	Bud/Flower		Buds		WeightBased	NotSubmitted		Grams		AK-47	
	Buds - Blue Dream		Bud/Flower		Buds		WeightBased	NotSubmitted		Grams		Blue Dream		

Figure 8: Items Menu

### **Metrc Support Bulletin**

For your new Capsule/Tablet item(s) to be properly set up the THC content, correct Unit of Measure (count based – each), and the package quantity must be included in the action window when creating the new item name. In this example, the packages will have 10 Capsules per pack with 10 grams of THC per package as shown in **Figure 9**.

Add Items						×
Item # 1						(clear)
Name	My Capsule 10pk		Unit of Measure	Each		~
Category	Capsule/Tablet	~	U. THC Content	10	Grams	~
+ 1 Why is there no Certain Item Cate in all of the select to create Items in	multi-Facility create such as that avail egories require the selection of a pre-exist ed Facilities would be convoluted and co multiple Facilities at the same time. Create Items Cance	ting S mple	in Employees, Strair Strain. Verifying and in x to inform. For this re	ns, and Location forming that the s ason we have op	specified Strain ex oted to not add the	ists ability

Figure 9: Creating a Capsule/Tablet Item Category

Now the new item can be seen in the items grid as shown below in **Figure 10**. Please note an item can't be edited once it has been used.

	Item : Category		:	Туре	:	Quantity Type			Default LTS	:	<u>UoM</u>	:
•	My Capsule 10pk	Capsule/Ta	blet	InfusedNonE	Edible	CountB	ased		NotSubmitted		Each
