Contact Point: Metric® Support	Subject: Lab Test Batch and Item Category Guidance	
Reason: Metric and the OMMA are providing a comprehensive guide to assist industry users on the correct categorization of different products and their required lab test batches		

Greetings Metric Users,

Metric in conjunction with the OMMA are pleased to provide a comprehensive guide on the correct usage of item categories and required lab test batches.

The chart groups the products under each stage of packaging and production in the first column. In each stage, the list of item categories includes common products that would be associated to each item category in the second column. The third column indicates what required lab test batches must be chosen when creating test sample packages.

Please see the following pages for details on these changes:
