Contact Point: Metrc® Support	Subject: Tracking Retailer	Deliveries
Reason: Provide information on the	latest feature to track retailer	deliveries.

Greetings Metrc® Users,

New functionality has been integrated into Metrc that allows retailers to track deliveries by generating a *Delivery Inventory Ledger* for all cannabis goods that will be provided to their drivers (in regulation referred to as delivery employees) to carry in their vehicles. Although use of this functionality is not required until April 1, 2023, the functionality is available now. For information on regulatory requirements refer to the Department of Cannabis Control's website at https://cannabis.ca.gov/.

A detailed description of this new feature is provided on the following pages.

Tracking Retailer Deliveries

In order for employees to use the new functionality to track retailer deliveries, the *Sales Delivery* permission must be enabled as shown in **Figure 1** below.

Sales Menu	
Sales	🗹 Manage
Sales Delivery	Manage

Figure 1: Employee Permissions - Sales Delivery Option

Before the cannabis goods leave the licensed premises with a driver in a delivery vehicle for a delivery trip, licensees will access the new functionality by selecting the *Retailer Deliveries* option from the *Sales* menu in the top navigation bar as shown in **Figure 2** below.

Do not select the *Deliveries* option on the *Sales* menu when creating a delivery trip. This option will be used when scheduled cannabis goods deliveries have been made or cancelled.

Figure 2: Sales Menu – Retailer Deliveries Option

On the *Retailer Deliveries* page, select the *Active* tab, then select the *Record Deliveries* button as shown in **Figure 3** below.

Retailer Deliveries										
Active Inactive										
Record Retailer Deliveries	Edit Deliveries View Ledger									

Figure 3: Record Retailer Deliveries Button

On the *Record Retailer Deliveries* modal enter the date and time the delivery was created, the date and time of the estimated departure, and the driver and vehicle information as highlighted below in **Figure 4**. Commonly used drivers and vehicles can be set-up in advance by employees granted the *Manage Transporters* permission and then selected using the magnifying glass lookup to populate the required information.

Figure 4: Record Retailer Deliveries

To enter orders that have been received and processed by the licensed retailer before the driver leaves the licensed premises, add one or more destinations using the add

destination button each order that will have a unique delivery location.

This will insert a *Destination* section, highlighted in **Figure 5** below, for selecting the county where the delivery is to be made, the estimated arrival time, the type of customer, the package(s) or partial package(s) (in regulation referred to as UID) to be delivered, the quantity to be delivered from each package, and the total price of the item. Please note that

the new optional fields for sales have not yet been implemented for *Retailer Deliveries* but is planned for the near future.

Figure 6: Record Product Carried in the Vehicle for Potential Sales

When all the necessary information is recorded, click the green *Record Sales Deliveries* button to save the delivery. The packages on the delivery will remain in the inventory of the licensee and the quantity adjusted for the amount taken in the delivery vehicle.

On the *Retailer Deliveries* page, the information just entered pertaining to the retailer delivery can be viewed. By clicking on the dropdown arrow next to the delivery number, the *Packages* tab displays the packages and quantities on the delivery for potential sales as shown in **Figure 7** below.

Figure 9: Retailer Delivery Before Departure

To record the departure of the driver and vehicle from the licensed premises for the delivery trip, select the *Start Driving* button on the far-right of the delivery row as shown in **Figure 9** above and select the *OK* button on the confirmation pop-up box shown in **Figure 10** below.

Figure 10: Start Driving Confirmation Pop-up Box

To view or print the most up-to-date copy of the *Delivery Inventory Ledger* at any time, highlight the retailer delivery row and then select the *View Ledger* button, which is also highlighted in **Figure 9** above. Inside the PDF file that displays when the *View Ledger* button is selected, there will be a ledger for unplanned deliveries and a ledger for each destination corresponding to orders that have already been received and processed by the licensed retailer. An example of the *Delivery Inventory Ledger* is shown in **Figure 11** below.

Figure 13: Record Sales from Potential Sale Packages

On the *Record Deliveries* modal, record the sale date/time, customer type, estimate date/time of arrival, county where the delivery is made, and the package(s) and quantity sold from each. Only packages originally added to the delivery trip for potential sales can be selected. When all the updates are made, select the green *Record Sales Deliveries* button. The quantity sold from each package is decremented by the quantity sold, the *Total Sold* column is incremented by the *Total Price* of each package sold, and a delivery id is assigned as shown in the *Delivery* tab highlighted in **Figure 14** below. As product sales/deliveries are recorded, the quantities on the *Delivery Inventory Ledger* are updated to reflect the remaining inventory in the vehicle.

Figure 19: Restock Delivery

When the green *Restock Sales Delivery* button is selected, the *State* of the retailer delivery changes from *Departed* to *Restocked* and the *Start* and *End* buttons are enabled on the delivery row. At this point the *Start* button will be selected to indicate that the driver and vehicle departed on the second leg to make further deliveries.

When a driver and vehicle return to the licensed premises or when a driver has no remaining inventory and does not return to the licensed premises, the delivery can be completed by selecting the *End* button. On the *End Retailer Delivery* modal, the actual arrival date/time should be entered, as well as the quantities of each package taken off the vehicle and returned to licensed premises as highlighted below in **Figure 21**. The package quantities will be adjusted by the *End Quantity*.
