Metrc Support Bulletin

Greetings Metrc Users,

Metrc has been made aware that some licensees with large numbers of finished packages are receiving errors when attempting to unfinish packages in order to rectify their inventory. Please be assured that our development team is aware and working on a solution.

Additionally, we have made the MED aware that this is an issue based on the reports that we have received.

Please stay tuned for an update as soon as it is available.

Please feel free to email **support@metrc.com** or call 877-566-6506 with any questions.
