

JUNE 7, 2018

Metrc® is pleased to provide some updates and information on the newest features available on Monday, June 11th. These were enhancements selected and prioritized by the Metrc User Group. We continue to thank the User Group for their participation in the process and the added value these enhancements bring to the system.

Those additional options include Login history, Package detail icons, Transfers counter, and Destination licensee. Please find following a full description of each new item detail:

Login History

The user drop-down menu has been updated to include Login history. This option allows users to view the history of their logins.

A screenshot of the 'Login History' table in the Metrc system. The table has a green header and a white body. It contains the following columns: 'Datetime', 'Success', 'IP Address', and 'Reason'. The table shows a list of login attempts, with one failed attempt highlighted in red.

Package detail Icons

Instead of drilling down to see package details you will see icons which give, at a glance, a hint of the history of the package. The user can hover over each icon to determine what it means.

- From left to right:
 - Contains at least one Plant Package
 - Contains at least one Product Package (e.g. buds, trim, brownies, etc.)
 - Contains at least one Lab Sample Package
 - Contains at least one Package flagged with "Product Requires Remediation"
 - Contains at least one Package that has Remediated Product

Transfers Counter

The Package section (Active, On Hold, and Inactive) has been updated to include a counter which tracks transfers associated with each package tag. If there is a “house” icon, it will be followed by the number of transfers associated with that package tag. If there is no “house” icon, then the package has never been transferred.

Destination Licensee

A new column labeled “Destination” has been added to the Transfer section to show the destination licensee. If a transfer has one destination, the licensee’s name and license number will be displayed. If the transfer has more than one destination, the text “multi-destination” will be displayed instead.

Updates to Testing for Microbials

In an effort to eliminate some confusion, the State will be changing the 3 current Microbial Contaminant Test Batches to:

- Microbial Contaminant
- Microbial Contaminant for Remediated Concentrates Only

This change will occur on June 14, 2018. The previous options will remain available until June 21, 2018, however licensees submitting test packages should use the new Test Batch options listed above starting June 14, 2018.

CSV Formatting Guide Now Available

A new guide is now available within the Support menu that includes formats for all Metrc CSV uploads. This guide offers updated information for each functional area within Metrc that allows for CSV data upload.

For any questions on these updated features, please contact the Metrc Support Desk at support@metrc.com or by calling 877-566-6506.
