

Bulletin Number: NJ_IB_0012	Distribution Date: 1/11/2024	Effective Date: 1/12/2024
Contact Point: Metrc® Support	Subject: Total Yeast and Mold Limit Update	
Reason: Metrc and the CRC are providing an update for the Total Yeast and Mold Limit Update		

Greetings,

Metrc in conjunction with the CRC are pleased to provide an update for testing Total Yeast and Mold. Please be advised that for Total Yeast and Mold Counts, the Commission is amending its limits to be consistent with Maryland's most recent METRC Support Bulletin issued in June of 2021. Thus, the TYMC Impurity Limit shall now be set at <100,000 CFU/g for Raw Plant Material and Raw Prerolls. The Commission has determined that the previous <10,000 CFU/g TYMC limit created several issues for both Testing Laboratories and Class 1 Cannabis Cultivators. To be consistent with the Maryland interim standards, and in anticipation of new NJ CRC testing guidance, which it amends as necessary in accordance with its own regulations, the CRC is raising the testing limit for Total Yeast and Mold for Raw Plant Material and Raw Prerolls to 100,000 CFU/g.
