

Bulletin Number: MO_IB_0044	Distribution Date: 09/10/2025	Effective Date: 09/10/2025
Contact Point: Metrc Support	Subject: New Feature - Clickable Links	
Reason: Announcing a new feature providing clickable package and transfer manifest hyperlinks.		

Greetings,

We are excited to announce a new feature, clickable links for Packages and Transfer Manifests. This feature will eliminate the need for manual searches by turning key references—like package IDs and manifest IDs—into direct access points – **see Figure 1 and 2.**

Figure 2 - clickable links are now available in Transfers Grid.

Now, when you click a hyperlink, a new tab will open displaying the tag in its most up-to-date location, right where you have access to view it.

- **Multiple License access?** You'll be taken directly to the active license where the item is located.
- **Single License access?** You'll land on the *Transferred* tab, showing exactly where the tag currently resides.

Transforming static data like package numbers and manifest IDs into interactive navigation points will help streamline workflows, reduce search time, and enhance operational visibility. This feature saves users time searching for Packages and Transfers by ensuring they get to the right information faster and with fewer clicks.
