Sharpen your skills with Metrc Learn

Elevate how you learn and grow with Metrc.

Streamline your learning journey

Metrc Learn was redesigned to provide users with interactive, educational information on system functionality to expand skillsets and drive workflow efficiencies.
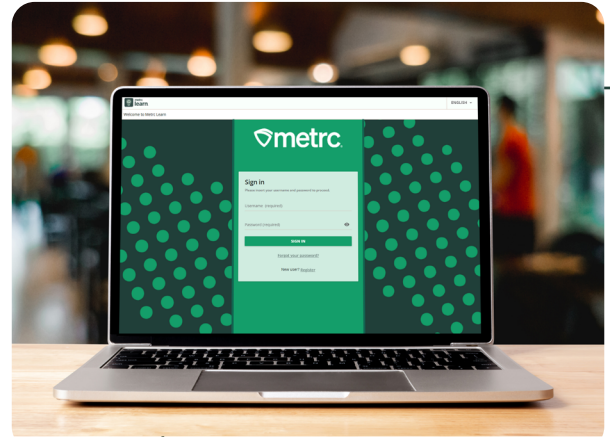

Here's what you can expect with Metrc Learn:

Enhanced user experience: A revamped user interface makes learning more intuitive and visually engaging.

Tailored content: You deserve a personalized learning journey. Facility- and role-specific content is available to tackle your unique challenges.

New Business Training: Foundational to the success of new Metrc users, content is continuously revamped to increase system proficiency – starting from day one.

Progress tracking: Monitoring your progress has never been easier. Keep tabs on completed courses, achievements unlocked, and areas for improvement – all in real-time.

# Learn anywhere, anytime

Metrc Learn is available through the free Go.Learn mobile application for Apple iOS and Android users to make training more accessible and convenient.

Metrc Learn now delivers a richer, more interactive learning experience with:

- Multimedia and visual-based content.
- New modules to expand topic coverage and introduce scenario-based learning.
- Personalized role-based paths so training aligns with individual goals and industry knowledge.
- Improved accessibility features—such as closed captioning, full-screen display, and playback controls—make training more inclusive.

Plus, Managers using Metrc Learn can assign targeted content by role and monitor progress, ensuring training remains relevant, effective, and easy to track.
