

Metrc Support Bulletin

Bulletin Number: NY_IB_0001	Distribution Date: 12/17/2025	Effective Date: Ongoing
Contact Point: Metrc Support	Subject: Item Product Chart	
Reason: Metrc provides guidance on item categories and lab test batches.		

Greetings,

Metrc, in conjunction with the New York Office of Cannabis Management (OCM), are pleased to provide bulk and final form item categories, along with our testing chart that shows how to correlate item categories with products and the appropriate lab test batches for testing.

Please read on for additional information.

Bulk Item Categories

Please review the Bulk Item Chart below:

- The left column displays the available item category
- The middle column contains the item type
- The right column displays if that product type requires a strain

Bulk Item Categories		
Item Category	Type	Requires Strain
<i>Seeds</i>	Plants	Yes
<i>Immature Plants</i>	Plants	Yes
<i>Hemp – Bulk</i>	Buds	Yes
<i>Hemp Concentrate – Bulk</i>	Concentrate	No
<i>Bud/Flower - Bulk</i>	Buds	Yes
<i>Concentrate/Extract- Bulk</i>	Concentrate	No
<i>Kief – Bulk</i>	Concentrate	No
<i>Infused Flower – Bulk</i>	Buds	Yes
<i>Infused Non-Edible – Bulk</i>	Infused Non-Edible	No
<i>Infused Edible – Bulk</i>	Infused Edible	No

Final Form Item Categories

Please review the Final Form Item Chart below:

- The left column displays the BioTrack item category
- The right column contains the corresponding Metrc Item Category

Final Item Categories	
Biotrack Item Category	Metrc Item Category
Usable Cannabis	Bud/Flower – Each
	Raw Pre-Roll – Each
	Infused Pre-Roll – Each
Cannabis Extract for Inhalation	Concentrate/Extract – Each
	Vape Cartridge – Each
	Kief – Each
Liquid Cannabis RSO	Concentrate/Extract – Each
Liquid Cannabis Infused Edible	Infused Edible – Each
	Tincture – Each
Solid Cannabis Infused Edible	Infused Edible – Each
Cannabis Infused Topical	Topical – Each

Testing Item Chart

Please review the Testing Item Chart below:

- The left column displays the item type, as well as some common names of items in that item type.
- The middle column contains the Lab Test Batch for required testing for medical products.
- The right column contains the Lab Test Batch for required testing for adult-use products.
- Research & development testing applies to bulk testing and is indicated with “Information Only” in parentheses.
 - Exceptions exist, see information below

Raw Plant Material		
Product Category in Metrc	Medical Lab Test Batch & Required Testing	Adult Use Lab Test Batch & Required Testing

--	---	---

Per the New York Office of Cannabis Management (OCM), please see instructions below on testing procedures for specific item categories.

Testing Procedure for Flower

- Prior to sampling and testing, a licensee must determine the final unit size anticipated at retail sale.
- The full lot does not have to be packaged prior to sample collection by the sampling firm or facility.
- The samples collected must be placed in the final packaging before they can be sent to the testing laboratory.
- The sampling technician must randomly choose which samples are tested for compliance. Licensee is not permitted to preselect samples for compliance testing.
- Once the licensee receives passing testing results from the permitted laboratory, the licensee must package the remainder of the lot within six (6) months of the test results.

Testing Procedure for Oil and Vape Cartridges

- For **single chamber vape cartridges**, licensees can utilize just individual cartridge sample testing, or they can utilize bulk oil + individual cartridge sample testing.
- For **dual chamber vape cartridges or All in One (AIO) vape cartridges**:
 - Requires sampling of bulk oil + individual cart from one chamber filled only, or individual vape cartridge only, with one chamber filled.
 - This will be repeated for the second chamber.
 - Once all test results are obtained, the results are joined into a single package UID.
 - A retail item UID is linked to all respective test results and COAs.
- For **multi-chamber (3 or more) vape cartridges**:
 - Requires sampling of bulk oil + individual cart from one chamber filled only, or individual vape cartridge only, with one chamber filled.
 - This will be repeated for each chamber.
 - Once all test results are obtained, the results are joined into a single package UID.
 - A retail item UID is linked to all respective test results and COAs.

Testing Procedure for Retention Samples

- Retention samples will be set aside at the time of the sampling event for the product.
- The retained quantity must be representative of the lot and contain enough material to allow for complete testing of the product two times.
 - For non-flower products, licensees must maintain a minimum of 35 grams packaged in the same form, to be available to retail consumers.
 - For flower products, license must maintain a minimum of 54 grams packaged in the same form, to be available to retail consumers.
- Retention samples must be held until the date of expiration.

Facilitating Process of Bulk Pulled Testing Samples

- To submit a sample pulled from a bulk package for final form compliance testing, follow the steps below:
 - o In Metrc, locate and select the source bulk package from which the sample will be taken. See image 1.
 - o From the package actions, select Submit for Testing.
 - o When completing the testing submission, do not select "Same Item". Instead, in the test sample window, choose the appropriate final form item type. Please see image 2 below.
 - o Enter the sample quantity and complete all required fields for the test submission.
 - o Once submitted, the final form compliance testing batch will be created and available for selection in the system.
- This process ensures the sample is properly associated with the final form item and routed through the correct compliance testing workflow.

Submit for Testing

New Package Sample # 1

New Tag: 1A412030000001C000028964

Location: Packages Vault

Sublocation: Type part of the Sublocation name

Item: Ambush 7g

Quantity: 2 Each

Note:

Package Date: 12/17/2025

Self-By Date: 12/04/2026

Required Testing:

- ☒ AU Raw Plant Material - Final Form
- ☐ Medical Raw Plant Material - Final Form
- ☐ R&D Testing - Aspergillus
- ☐ R&D Testing - Metals
- ☐ R&D Testing - Microbials - Salmonella
- ☐ R&D Testing - Microbials - STEC
- ☐ R&D Testing - Microbials - Total Viable Aerobic Bacteria
- ☐ R&D Testing - Microbials - Total Yeast and Mold
- ☐ R&D Testing - Mycotoxins
- ☐ R&D Testing - Pesticides
- ☐ R&D Testing - Potency (%)
- ☐ R&D Testing - Potency (mg/g) Infused Products
- ☐ R&D Testing - Solvents
- ☐ R&D Testing - Terpenes
- ☐ R&D Testing - Water Activity
- ☐ Sub-Contract (All)

Metrc resources

If you have any questions, or need additional support, the following resources are available:

Contact Metrc Support

By navigating to [Support.Metrc.com](https://support.metrc.com), or from the Metrc System, click Support and navigate to support.metrc.com and it will redirect to the portal.

Please note: If accessing the portal for the first time, a username (which is established when logging in), the respective state and “Facility license number”, and a valid email to set a password are required.

Metrc Learn

Metrc Learn is designed to provide users with interactive, educational information on system functionality to expand skillsets and drive workflow efficiencies.

Accessing [Metrc Learn](#) is simple through the following convenient locations:

From within the Metrc system

Navigate to the Support area on the navigational toolbar and select “Sign up for Training” to register.

Access additional resources

In the Metrc system, click on the Metrc Expert icon and search for the appropriate topic or type in a question.

Thank you for your continued partnership.
