

Bulletin Number: NY_IB_0010	Distribution Date: 03/17/2026	Effective Date: Ongoing
Contact Point: Metrc Support	Subject: Transfer Variances	
Reason: Guidance on how to accept a transfer and return any unwanted inventory back to originating facility.		

Greetings,

Metrc in collaboration with the Office of Cannabis Management is pleased to provide guidance on how to accept transfers and send unwanted product back to originating facility.

Please find additional information below.

Transfer Variance Allowance

- To help improve inventory alignment, we are reducing the variance allowed between shipped and received package quantities by up to 5%.
- In this update, licensees will now have to confirm that they are accepting packages with a variance of up to 5%.
- Any variance over 5% will not be allowed to be accepted in your inventory.

Accepting Incoming Transfer

- To accept an incoming transfer, navigate to the Transfers page
- Within the Transfers grid, you will see incoming packages.
- To receive a package in your inventory, select “Receive”. See image 1.

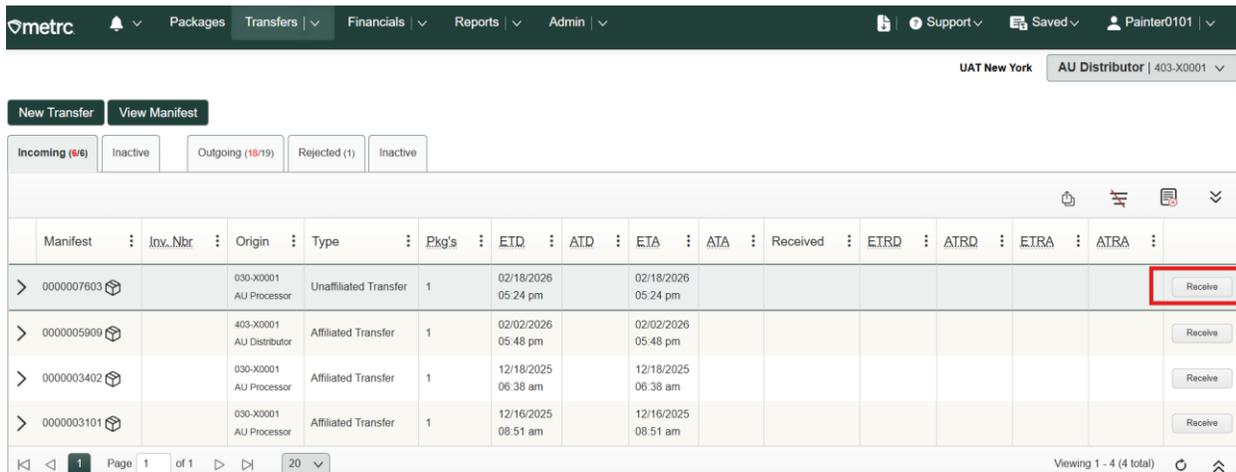

Image 1 – Receiving Incoming Transfer

- Once you select Receive, a window will pop up confirming the inventory you are receiving into your facility.
- If there is a variance in the package you received, include the count of units that you are physically receiving.
- If there is a variance in the inventory accepted, confirm the variance of transfer on the Received Transfer window. See image 2.

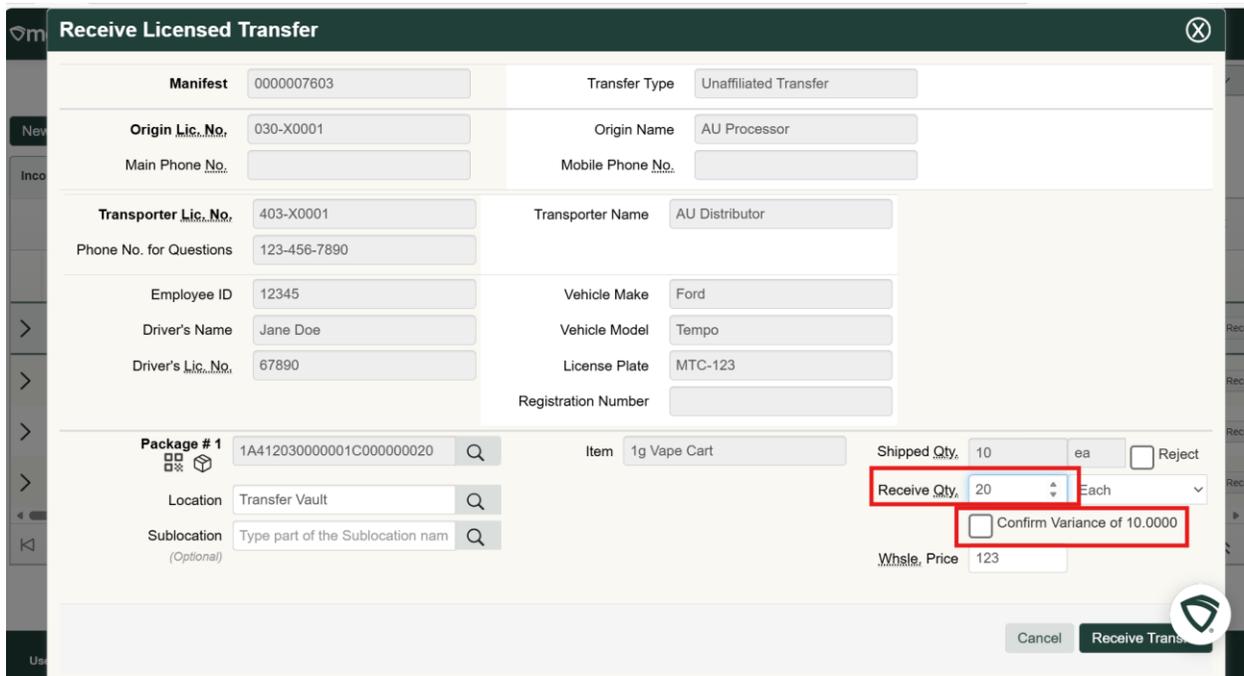

Image 2 – Confirming Transfer Variance

Handling Discrepancies with Incoming Transfers

- If discrepancy after accepted inventory, you will need to adjust the package to the correct physical count.
- To complete this, select the package that was accepted into your inventory, and then select “Adjust. See image 3.

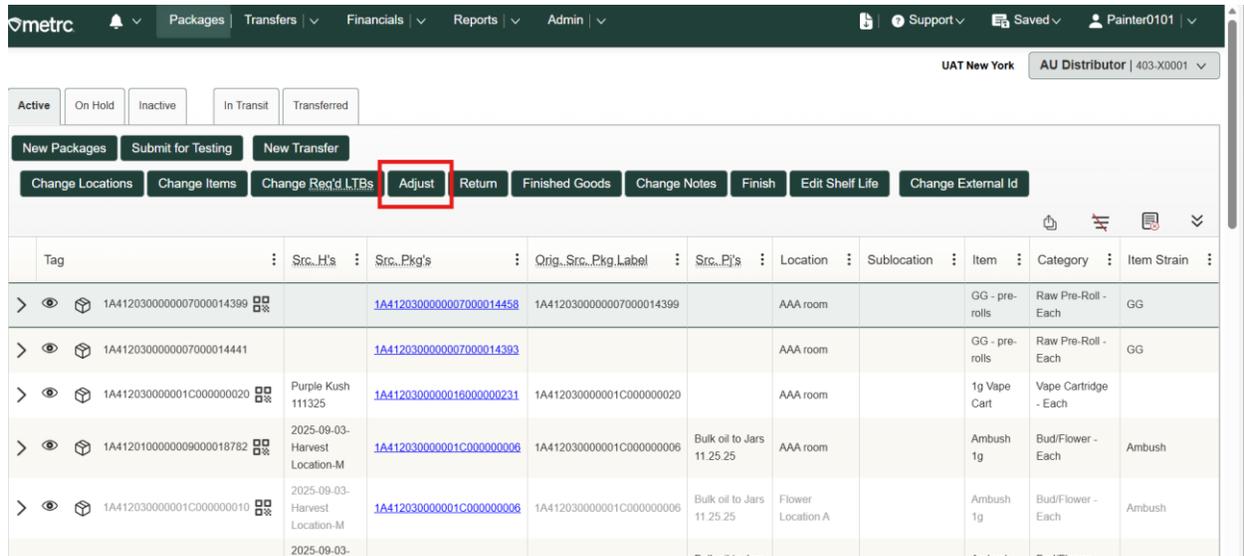

Image 3 – Adjust Packages

- Once selected, a window will pop up to adjust your package.
- Select Entry Error for adjustment reason.
- For the required note, describe in as much detail as possible on what occurred with the transfer discrepancy.
- Include the correct count of product in your inventory. If the quantity is less than what is in the package, include “-“ in front of the number to decrease package quantity.
- Select “Adjust Packages” to confirm adjustment. See image 4.

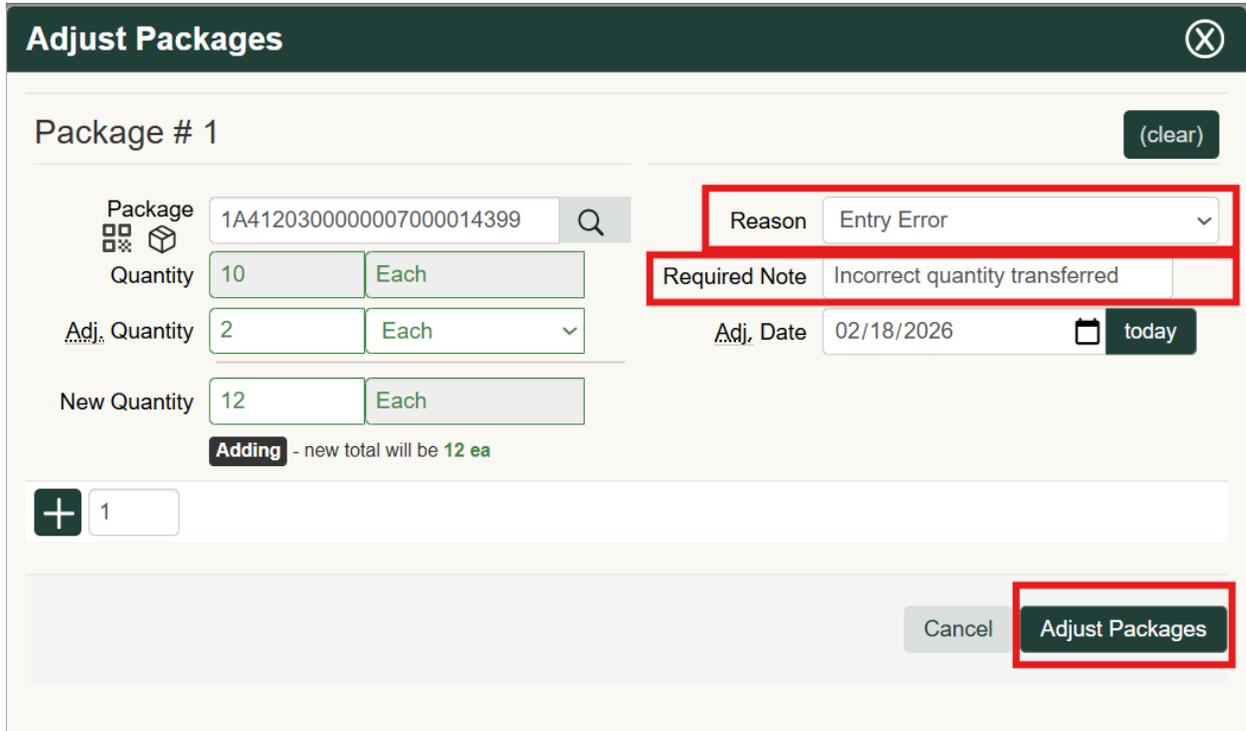

Image 4 – Adjusting Package Reason

Handling Returns for Incorrect Inventory Amounts

- If you received an incoming transfer, and there are more units in that transfer that were requested, please see instructions on how to handle this in the Metric system.
- If received incoming transfer is an incorrect quantity, you will need to first accept this inventory in your account to initiate a return.
- To return the product quantity that is unwanted, you will need to repackage that material into a new Package UID.
- To complete this step, select the package that was received into your inventory and then select “New Package”. See image 5.

Image 6 – Creating New Package UID

- You will need to include those physical products into a container and adhere the new physical Package UID to that new container.
- Next, you will initiate a new transfer using this newly created package.
- To complete, select the Package UID recently created, and select New Transfer. See image 7.

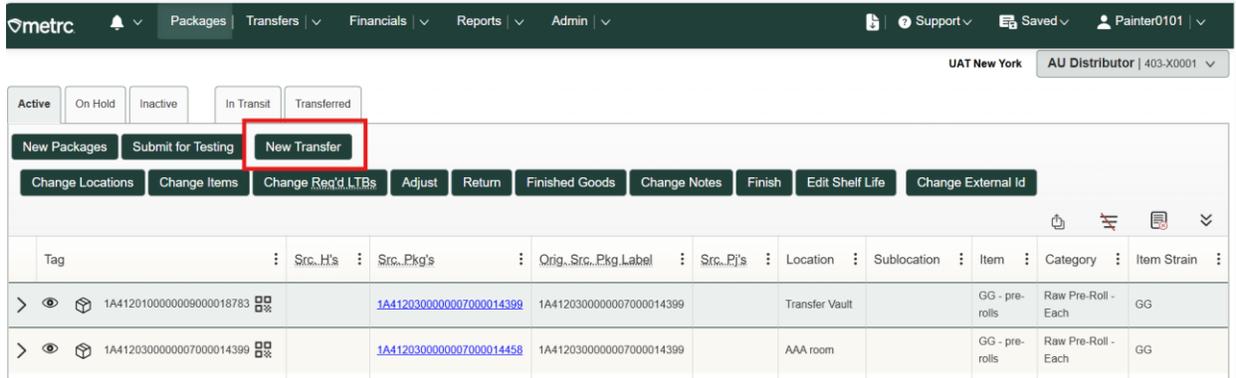

Image 7 – Initiating New Transfer

- The New Transfer window will appear. In the New Transfer window, select the facility you would like to return the product to and register the transfer. See image 8.

Metrc Resources

If you have any questions, or need additional support, the following resources are available:

Contact Metrc Support by using the new full-service system – Service Cloud – by navigating to [Support.Metrc.com](https://support.metrc.com), or from the Metrc System, click the Support area dropdown on the navigational toolbar and click support.metrc.com to redirect to the portal.

Please note: If accessing the portal for the first time, a username (which is established when logging in), the respective state and “Facility license number”, and a valid email to set a password are required.

Metrc Learn: Metrc Learn was recently redesigned to offer interactive educational opportunities to enhance Metrc system users’ skills and provide various training options based on experience level.

In addition, the learning system is organized into facility-specific programs made up of various courses. To login or register for an account, visit [Metrc Learn](#).

Access additional resources: In the Metrc system, click on the Support area dropdown on the navigational toolbar and select the appropriate resource, including educational guides, manuals, and more.

Thank you for your continued partnership.
