

Bulletin Number: CO_IB_9.4.2026_Mother Plants Functionality	Distribution Date: 9/4/2026	Effective Date: 9/14/2026
Contact Point: Metrc Support	Subject: New Feature: Mother Plants Functionality	
Reason: Introducing a centralized tool designed to empower cultivators with greater control and visibility when managing mother plants		

Greetings,

To improve mother plant tracking and unlock the full potential of your cannabis genetics, the Metrc system will now allow mother plants to be identified through a new **Mother Plants growth phase and tab** under the Plants section.

The Mother Plants tab provides a centralized view of plants assigned to the Mother Plants growth phase, making it easier for cultivators to manage mother plants and monitor associated clone activity. Mother plant information is also included in several plant-related reports.

Key benefits:

- **Track mother plants & clones:** Easily monitor the health and lineage of each mother plant and its clones.
- **Data-driven decisions:** Make informed choices with insights into survival rates and lifecycle health.
- **Preserve genetic integrity:** Ensure your most valuable genetics stay strong and productive.
- **Maximize propagation success:** Achieve higher clone success rates and more reliable results.
- **Scalable insights:** Ready your cultivation for future growth with clear, connected data on every plant's legacy.

The Mother Plants tab displays all active Mother Plants in the facility that are assigned to the Mother Plants growth phase. To view destroyed Mother Plants, navigate to the Inactive tab.

Creating Plantings from Mother Plants

Plantings can be created directly from a mother plant. To create plantings from a Mother Plant, highlight the Mother Plant and select Create Plantings to complete the action.

Create Plantings

When new immature plantings are created from a mother plant, the Cloned and Survived columns are updated accordingly. Adding, subtracting, or adjusting plant batches will also update these columns for the associated mother plant.

Description

Planted
- Plant Batch "PB 5.22.26"

Plant moved to location "Veg Aisle 1"
- Location Type: default

Changed Growth Phase to Vegetative

Attached tag ABCDEF0000000C0000019895

Changed Growth Phase to Mother

Moved to location "Mother Plants Room 1"
- Location Type: Mother Plants Room 1

Plant Batch (ABCDEF0000000C0000019895) created with 15 Clones of "Cinderella 99 5.22.26" strain
- Clone(s) taken from a Mother Plant ([ABCDEF0000000C0000019895](#))

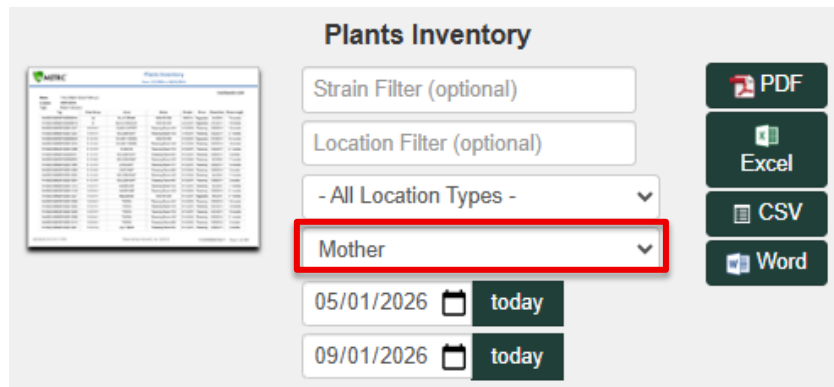

Plant Waste recorded
- Waste Method: Made it Unusable and Unrecognizable
- Material Mixed: dirt
- Total Waste: 40 Grams (40 per Plant, 1 total Plant)
- Waste Reason: Pre-Harvest Plant Maintenance
- Note: pruning

Plant Batch (C99 - 18 - 8.25.26) created with 18 Clones of "Cinderella 99 5.22.26" strain
- Clone(s) taken from a Mother Plant ([ABCDEF0000000C0000019895](#))

Reports Including Mother Plants

Mother plant data is also available in several plant-related reports, including:

- Plant Trend
- Facility Metrics
- Plants Inventory
- Plants Destroyed
- Inventory Point in Time
- Monthly Plants Inventory

Plants Inventory
